INTRODUCTION

This report gives final figures from the 1971 Census on labour force activity as reported for the week prior to enumeration. Tables 1, 2 and 3 include all persons 15 years and over, showing labour force activity and sex. Tables 1 and 2 are classified by age group, school attendance, and level of schooling, for Canada, provinces, and census metropolitan areas, while Table 3 is classified by date of completion of vocational training, for Canada and provinces. Table 4 includes those persons 15 years and over who have completed vocational training, showing labour force activity, classified by kind of vocational course, and sex, for Canada and regions. Table 5 gives figures for the labour force 15 years and over, showing level of schooling and sex, by class of worker and age group, for Canada and provinces.

In the 1971 Census, labour force refers to non-inmates 15 years and over, who, in the week prior to enumeration, worked for pay or profit, helped without pay in a family business or farm, looked for work, were on temporary lay-off, or had jobs from which they were temporarily absent because of illness, vacation, strike, etc. Persons doing housework in their own home or volunteer work only, are excluded from the labour force. Also excluded are female farm workers who indicated that they helped without pay in a family farm or business for less than 20 hours. It should be noted that there are indications that the labour force counts for Quebec may be somewhat underestimated due to response problems. Further information regarding the labour force counts is available in the Population and Housing Research Memorandum (PH-EC-4) "Background Information on the 1971 Census Labour Force Data". This paper can be obtained on request from the Census User Inquiry Service.

For information on the comparability of the 1971 Census with earlier censuses and the Labour Force Survey, refer to the introductory report to this volume (Catalogue No. 94-771).

The information in this report was collected on a 33 1/3% sample basis. As a result, the population for a given geographic area may differ from that shown in reports containing data collected on a 100% basis. The latter figures, of course, represent the official population counts (see Catalogue No. 92-715).

The 1971 Census figures in this report have been subjected to a confidentiality procedure to prevent the possibility of associating small figures with any identifiable individual. The particular technique used is known as "random rounding". Under this method, all last or "unit" digits in a table (including all totals) are randomly rounded (either up or down) to "0" or "5". This technique provides the strongest possible protection against direct, residual, or negative disclosures without adding any significant error to the census data. However, since totals are independently rounded they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census reports.

DEFINITIONS

Labour force activity: Refers to the labour market activity of persons 15 years and over in the week prior to enumeration, i.e. working for pay or profit or in unpaid family work, looking for work, on temporary lay-off, or with a job but not at work.

Employed labour force: Refers to all non-inmates 15 years and over, who, during the week prior to enumeration, worked for pay or profit, or in unpaid family work. It also includes persons who had a job from which they were temporarily absent, because of illness, vacation, strike, etc. (provided they were not also looking for work).

Unemployed labour force: The unemployed consists of all non-inmates 15 years and over, who, during the week prior to enumeration, were not working but were looking for work, or were on temporary lay-off, or would have been looking for work except that they were temporarily ill, or believed no suitable work was available in the community.

Ce bulletin présente les chiffres définitifs du recensement de 1971 en ce qui concerne l'activité sur le marché du travail pendant la semaine précédant le dénombrement. Les tableaux 1, 2 et 3 indiquent la population de 15 ans et plus par activité et sexe. Les tableaux 1 et 2 sont classés selon le groupe d'âge, la fréquentation scolaire et le niveau de scolarité, pour le Canada, les provinces et les régions métropolitaines de recensement, tandis que le tableau 3 l'est selon la date d'achèvement du cours professionnel, pour le Canada et les provinces. Le tableau 4 indique les personnes de 15 ans et plus qui ont terminé un cours professionnel, par activité, selon le genre de cours professionnel et le sexe, pour le Canada et les régions. Le tableau 5 donne les chiffres concernant la population active de 15 ans et plus, par niveau de scolarité et sexe, selon le statut et le groupe d'âge, pour le Canada et les provinces.

Au recensement de 1971, la population active comprend les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice ou sans rémunération dans une entreprise ou une ferme familiale, ont cherché du travail, étaient en congédiement temporaire ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. Les personnes faisant seulement des travaux ménagers chez elles ou du travail bénévole sont exclues de la population active. Sont également exclues les travailleuses agricoles qui ont indiqué avoir travaillé moins de 20 heures sans rémunération dans une ferme ou une entreprise familiale. Il est à noter que, suivant certaines indications, la population active du Québec est peut-être quelque peu sous-estimée, en raison de certaines difficultés d'interprétation. On trouvera de plus amples renseignements concernant les chiffres de la population active dans une Note de recherche sur la population et le logement (PH-EC-4) intitulée "Étude des données du recensement de 1971 sur la population active". Cette note de recherche peut être obtenue sur demande au Service-utilisateurs du recensement.

Pour des détails sur la comparabilité du recensement de 1971 avec les recensements antérieurs et l'enquête sur la population active, voir l'introduction à ce volume (n° 94-771 au catalogue).

Les renseignements de la présente publication ont été recueillis sur un échantillon de 33 1/3 %. Il s'ensuit que les chiffres de population pour une région géographique donnée ne sont pas forcément les mêmes que ceux des publications dont les données sont intégrales. Bien entendu, ce sont ces dernières données qui représentent les chiffres officiels de population (voir la publication n° 92-715 au catalogue).

Par souci de confidentialité, les chiffres du recensement de 1971 publiés ici ont été soumis à une formule qui interdit la possibilité d'associer des chiffres de faible importance à une personne reconnaissable. Cette technique particulière s'appelle l'"arrondissement aléatoire". Grâce à cette méthode, tous les derniers chiffres, c'est-à-dire les chiffres des unités (y compris tous les totaux) des tableaux sont arrondis de façon aléatoire (vers le haut ou vers le bas) à "0" ou à "5". Cette technique assure la protection maximale contre la divulgation directe, négative ou par recoupements, sans ajouter d'erreur significative aux données. Toutefois, puisque les totaux sont arrondis séparément, ils ne sont pas nécessairement égaux à la somme des chiffres individuels arrondis dans les distributions. De plus, il faut s'attendre que les totaux et les autres chiffres correspondants dans divers bulletins du recensement présentent quelques légères différences.

DÉFINITIONS

Activité: Activité sur le marché du travail des personnes de 15 ans et plus au cours de la semaine précédant le dénombrement (travaillant contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, cherchant du travail, en congédiement temporaire, ou ayant un emploi mais n'étant pas au travail).

Population active occupée: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ont travaillé contre rémunération ou en vue d'un bénéfice, ou sans rémunération dans une entreprise familiale, ou avaient un emploi dont ils étaient temporairement absents à cause d'une maladie, de vacances, d'une grève, etc. (pourvu qu'ils n'aient pas également cherché du travail).

Population active en chômage: Tous les non-pensionnaires d'institution de 15 ans et plus qui, au cours de la semaine précédant le dénombrement, ne travaillaient pas mais cherchaient du travail, ou étaient en congédiement temporaire, ou auraient cherché du travail s'ils n'avaient pas été temporairement malades, ou s'ils n'avaient pas été convaincus qu'il n'y avait pas de travail convenable disponible dans la localité.

DEFINITIONS — Concluded

Not in the labour force: Refers to all persons 15 years and over not classified as members of the labour force. Most persons in this category are students, housewives, retired workers, seasonal workers in an "off" season who are not looking for work, and persons who cannot work because of long-term physical or mental illness or disability, including inmates of institutions.

Participation rate: The percentage the labour force forms of the population 15 years and over in the category or area.

Unemployment rate: The percentage the unemployed forms of the labour force in the category or area.

Age: Classifications are based on the number of completed years of age at last birthday prior to June 1, 1971.

Class of worker: Refers to the classification of employment according to whether persons mainly worked for others for wages, or helped without pay in a family farm or business, or mainly worked for themselves with or without paid help in their job in the week prior to enumeration, or if not employed at that time, in their job of longest duration since January 1, 1970. Those who were self-employed were asked in addition, if their farm or business was incorporated.

Wage-earners: Persons 15 years and over, who indicated that in the job reported, they were mainly working for wages, salaries, tips or commissions. Included are persons working for piece-rates, those working for payment "in kind" in non-family enterprises, salesmen on commission working for only one company and not maintaining an office or staff, and persons working casually by the day as odd-job labourers and baby-sitters. Self-employed in incorporated companies are included as wage-earners in 1971, but were probably not included in 1961.

Self-employed: Persons 15 years and over, for whom the job reported consisted mainly of self-employment (including partnership) in their own unincorporated business, professional practice or farm, with or without paid help. Included are persons working mainly on contract or as free lancers, private duty nurses, etc.

Unpaid family workers: Persons 15 years and over, for whom the job reported consisted mainly of work without regular money wages for a relative who was a member of the same household, at tasks which contributed to the operation of the business or farm owned or operated by the relative.

Evaluation of female unpaid family worker counts indicates these may be inflated by about 25% through reporting and processing errors. These errors resulted in improper inclusion of some females in the labour force and confusion with the wage-earner category.

School attendance: Refers to either full-time or part-time attendance at any type of educational institution since September 1970.

Level of schooling: Refers to the highest grade or year of elementary school, secondary school or university ever attended, excluding post-secondary non-university education. Individuals may have completed vocational training, either apprenticeship or other full-time courses, in addition to the schooling shown.

Vocational training: Refers to a full-time vocational course of three months duration or longer, that is non-academic in nature (i.e. not leading to a secondary school diploma or a university degree or diploma). The kind of vocational training refers to the field of an apprenticeship or other full-time vocational course, e.g., carpentry, barbering, drafting, etc. Date of completion refers to the period when the vocational course was completed.

Census Metropolitan Area (CMA): The main labour market of a continuous built-up area having 100,000 population or more.

The estimates of the mean square error for the characteristics covered in this report were not available at the time of publication. They will be available in the introductory report to this volume (Catalogue No. 94-701). Those users requiring this information prior to the release of the introductory report should contact the Census User Inquiry Service.

DÉFINITIONS — fin

Inactifs: Toutes les personnes de 15 ans et plus qui ne font pas partie de la population active. La plupart des personnes de cette catégorie sont des étudiants, des maîtresses de maison, des retraités, des travailleurs saisonniers recensés en saison morte et ne cherchant pas de travail, ou des personnes qui ne peuvent travailler en raison d'une maladie ou d'une infirmité physique ou mentale de longue durée, y compris les pensionnaires d'institution.

Taux d'activité: Pourcentage de la population active par rapport à la population de 15 ans et plus de la catégorie ou du secteur donné.

Taux de chômage: Pourcentage des chômeurs par rapport à la population active de la catégorie ou du secteur donné.

Âge: Nombre d'années révolues au dernier anniversaire avant le 1^{er} juin 1971.

Statut: Classement des personnes occupées suivant qu'elles ont surtout travaillé contre rémunération, qu'elles ont travaillé sans rémunération dans une entreprise ou une ferme familiale ou qu'elles ont travaillé surtout à leur compte, avec ou sans aide rémunérée, dans l'emploi qu'elles occupaient au cours de la semaine précédant le dénombrement ou, si elles n'avaient pas d'emploi à ce moment-là, dans leur emploi de plus longue durée depuis le 1^{er} janvier 1970. Les travailleurs indépendants devaient également indiquer si leur ferme ou leur entreprise était constituée en corporation.

Salariés: Personnes de 15 ans et plus qui ont indiqué que, dans l'emploi qu'elles occupaient, elles travaillaient surtout contre rémunération, à la commission ou pour des pourboires. Sont compris les personnes travaillant à la pièce, les personnes travaillant contre rémunération en nature dans une entreprise non familiale, les vendeurs travaillant à la commission pour une seule entreprise et n'ayant ni bureau ni personnel, ainsi que les personnes travaillant occasionnellement à la journée, comme les hommes à tout faire et les gardiennes d'enfants. Les travailleurs indépendants dans des entreprises constituées en corporation sont compris comme salariés en 1971, mais ils ne l'étaient probablement pas en 1961.

Travailleurs indépendants: Personnes de 15 ans et plus dont l'emploi déclaré consistait surtout en travail autonome (y compris en association) dans leur entreprise, profession ou ferme non constituée en corporation, avec ou sans aide rémunérée. Sont comprises les personnes travaillant surtout à contrat ou à la pique, les infirmières privées, etc.

Travailleurs familiaux non rémunérés: Personnes de 15 ans et plus dont l'emploi déclaré consistait surtout en travail sans rémunération régulière en espèces pour un parent membre du même ménage à des tâches contribuant à l'exploitation de l'entreprise ou de la ferme dont le parent était le propriétaire ou l'exploitant.

L'évaluation des chiffres des travailleuses familiales non rémunérées révèle une surestimation possible d'environ 25 % attribuable à des erreurs d'observation et d'exploitation. Ces erreurs ont entraîné l'inclusion erronée de certaines femmes dans la population active ainsi qu'une certaine confusion avec la catégorie des salariées.

Fréquentation scolaire: Fréquentation à plein temps ou à temps partiel de n'importe quel genre d'établissement d'enseignement depuis septembre 1970.

Niveau de scolarité: Dernière année d'études primaires, secondaires ou universitaires, sans la formation postsecondaire non universitaire. A remarquer qu'on peut avoir fait un cours professionnel (apprentissage ou autre cours à plein temps) en plus de la scolarité indiquée.

Cours professionnel: Cours professionnel à plein temps d'une durée de trois mois ou plus, autre qu'un cours de nature scolaire ou universitaire (c.-à-d. ne menant pas à un certificat d'études secondaires ni à un grade ou diplôme universitaire). Le type de cours professionnel désigne le domaine de l'apprentissage ou d'un autre cours professionnel à plein temps, par ex., menuiserie, coiffure, dessin, etc. La date d'achèvement est la période où s'est terminé le cours professionnel.

Région métropolitaine de recensement (R.M.R.): Principal marché du travail d'une zone bâtie en continu comptant 100,000 habitants et plus.

Les estimations de l'erreur quadratique moyenne des caractéristiques données dans ce bulletin n'étaient pas connues au moment de la publication. Elles seront disponibles dans l'introduction de ce volume (n° 94-701 au catalogue). Les utilisateurs désireux de connaître ce renseignement avant la publication du bulletin d'introduction devront s'adresser au Service-utilisateurs du recensement.

Publications of the Census of Canada, 1971

This report is one of the Volume Series of publications of the 1971 Censuses of Population, Housing and Agriculture. Altogether, there are some 225 reports in this series prepared in such a way that by removal of their covers the contents can be combined to form the materials comprising the 6 volumes and 25 separate volume parts in the entire series. A hard-covered binder, suitably titled, is included in the composite price to purchasers of the complete set of reports for any given volume part.

Catalogue of reports

A catalogue is available which describes the individual reports in the Volume Series of 1971 Census publications as well as reports in other series (i.e., Advance Series, Census Tract Series, and Special Series). The catalogue also includes a price list and an order form. A copy of this catalogue may be obtained from Publications Distribution, Statistics Canada, Ottawa K1A 0T6. For further information on census publications, address your inquiry to Information Division, Statistics Canada.

How to order reports

Orders for reports may be sent to Publications Distribution, Statistics Canada, Ottawa K1A 0T6, or to Publishing Division, Information Canada, Ottawa K1A 0S9. Enclose payment with your order in the form of a cheque or money order made payable to the Receiver General of Canada. If more convenient, census publications may be ordered from Information Canada bookstores in Halifax, Montreal, Ottawa, Toronto, Winnipeg, or Vancouver. For other details concerning deposit accounts, bulk orders, etc., contact Publications Distribution, Statistics Canada.

Other forms of publication

In addition to the tabulated results of the 1971 Census published in reports and bulletins, a large number of tables will be issued to users as copies of computer print-outs. These will also be available in microform. A variety of statistical tables may be purchased on computer "summary" tapes for further computer analysis by users. Details of the content, prices, and availability of census tabulations in these output media may be obtained from the User Inquiry Service, Census Field, Statistics Canada, Ottawa K1A 0T7.

Special tabulations

To the extent that confidentiality constraints permit, Statistics Canada will produce for users at cost, special tabulations not already included in the planned tabulation programme. Requests should be sent to the Census User Inquiry Service specifying clearly the precise classifications or cross-classifications and the geographic areas. The exact categories for each characteristic and a rough table layout should be included.

Maps and geographic files

Large-scale maps may be purchased to show the boundaries of enumeration areas (i.e., the territory covered by each Census Representative in taking the census), as well as small-scale maps of census divisions and other statistical areas. Supporting documentation relating to the census geographic files (i.e., place names, codes, etc.) are available in tabular form identifying the component enumeration areas of administrative and statistical units (e.g., towns, villages, municipalities, tracts). Further details, including costs to users, may be obtained from the User Inquiry Service of the Census Field of Statistics Canada.
